*Call for other sizes, colors and materials. Direct thermal labels also available.

*Labels also available for smaller printers requiring 1"core/4 or 5" outside diameter.

Thermal Transfer Ribbon Specifications

- Ribbons are a resin enhanced wax ribbon that works well on thermal transfer, gloss and matte label materials.
- It is recommended that ribbon width be wider than label width so print head does not contact label material.
 - For example, a 4" label should use a 4.17" ribbon.
- Ribbon also works well on inexpensive polypropylene labels or labels with thermal transfer varnish.
- Ribbons listed are for standard, larger printers. Ribbons will not work in smaller printers.
- Please call for pricing on smaller case packs and ribbons for smaller printers and different length ribbons.
- Also call for other ribbon formulations such as midrange, full resin or color ribbons
- For cost effectiveness, ribbons are drop shipped from manufacturer in Pennsylvania.
